1. LETTER FROM MANAGEMENT

Dear investors and business partners, dear employees,

the Katjes International Group successfully continued its growth trajectory in the first half of 2026, marking a strong start to the current financial year. This positive business development provides a solid foundation for achieving the guidance set for the full year, both in terms of Group revenue and EBITDA margin.

With the acquisition of an approximately 27% stake in Missoni in May 2026, which is included in the consolidated financial statements using the equity method, Katjes Quiet Luxury has expanded its portfolio to include a further globally renowned luxury brand, following the acquisition of the Bogner Group last year.

Another important milestone in the first half of the year was the successful completion of the acquisition of the British healthy snacking brand Graze ("Nature Delivered Ltd.") from Unilever in February 2026, through which Katjes International expanded its brand portfolio while also taking over the London production site.

This growth is driven by several mutually reinforcing developments: the first-time inclusion of the Bogner companies, which have been part of Katjes International since September 2025, the inclusion of Graze, the continuous work on our brand portfolio and our investments, as well as stable demand in our core markets. This development underscores the strength of our business model as a brand holding company focused on consumer goods in Europe.
With Katjes Quiet Luxury, we have extended this path to include a brand world that fits well with our strategy – brands with substance that rely not on quick effects but on permanence. As a brand holding company, we are committed to a portfolio in which strong brands stand side by side and continue to develop.

Katjes International increased Group revenue in the first half of the year by around 55% to EUR 256.0 million (previous year: EUR 164.8 million). At EUR 15.8 million, EBITDA for the reporting period exceeded the prior-year figure of EUR 13.9 million as at June 30, 2025 by around 14%. As Bogner also shows a clear weighting towards the second half of the year, the inclusion of these companies simultaneously reinforces the Group's seasonal pattern. This is partly offset by the positive earnings contributions from Graze as well as effects from the purchase price allocation in connection with this acquisition.

Against this background, and in line with our forecast, we expect a significant increase in earnings over the remainder of the year. Our two joint ventures, which have been distributing their products since the second quarter of 2025, continue to perform very well. The joint venture "Shirin Beauty", founded together with musician Shirin David, has successfully established its bodycare line in the drugstore retail channel and expanded it with a new line in June 2026.

Also performing very encouragingly is Shades Snacks Ltd., operated together with the well-known YouTuber Niko Omilana, whose "Shades by Niko" brand is seeing very positive market development in the United Kingdom.

Our strategy also rests on a solid financial foundation. As at the reporting date, Group equity amounted to approximately EUR 255.1 million, corresponding to an equity ratio of around 30%. At the same time, despite the acquisitions made during the reporting period, we continued to hold a comfortable liquidity position of EUR 74.1 million. This means that, as a brand holding company and active consolidator in the European consumer goods market, we remain well positioned.

Based on the business development in the first half of the year, we are very positive about the full year. We continue to expect to meet or exceed our guidance of expected Group revenue of at least EUR 650 million and an expected EBITDA margin of 10% – 12%.

In closing, we would like to thank our employees at Katjes International and at our subsidiaries for their strong commitment, and you, our valued investors and business partners, for your trust in our work.

Kind regards,

Bastian Fassin – Managing Partner
Tobias Bachmüller – Managing Partner
Stephan Milde – CFO, Managing Director

2. MANAGEMENT TEAM

BASTIAN FASSIN

Managing Partner of Katjes International

Career

- since 2004 – Managing Partner of Katjes International
- until 2003 – Marketing and Sales, Kraft Foods
- until 2000 – Roland Berger Strategy Consultants

TOBIAS BACHMÜLLER

STEPHAN MILDE

Managing Director (CFO) of Katjes International

Career

- since 2012 – CFO of Katjes International
- Before: several years in Investment Banking at Deutsche Bank and Citigroup in London

3. KATJES INTERNATIONAL

Established in 2011 as a spin-off from predecessor companies, Katjes International GmbH & Co. KG (“Katjes International”) today forms the Katjes Group together with its two independent and legally autonomous sister companies, Katjes Fassin GmbH + Co. KG (“Katjes Germany”) and Katjesgreenfood GmbH & Co. KG (“Katjesgreenfood”). Within the Group, Katjes International consolidates its shareholdings in established and strong local brands across Europe.

Clear growth strategy

To achieve its goal of sustainable and profitable growth, Katjes International relies on the consistent development and expansion of its brands. In addition, further acquisitions form part of its clearly defined growth strategy. Against this background, potentially interesting companies, particularly in the Consumer Goods sector in Europe, are continuously being reviewed.

Strong brands

Through its investments in strong consumer goods brands, Katjes International is currently active in particular in the core markets of Germany, the United Kingdom, Italy, Switzerland, the Netherlands, Austria, France and Spain. The individual brands and companies operate largely independently, both legally and organizationally, within their respective markets. At the same time, they receive targeted support within the Group in developing their brands. The brands are typically focused on clearly defined product characteristics and are increasingly oriented towards sustainability.

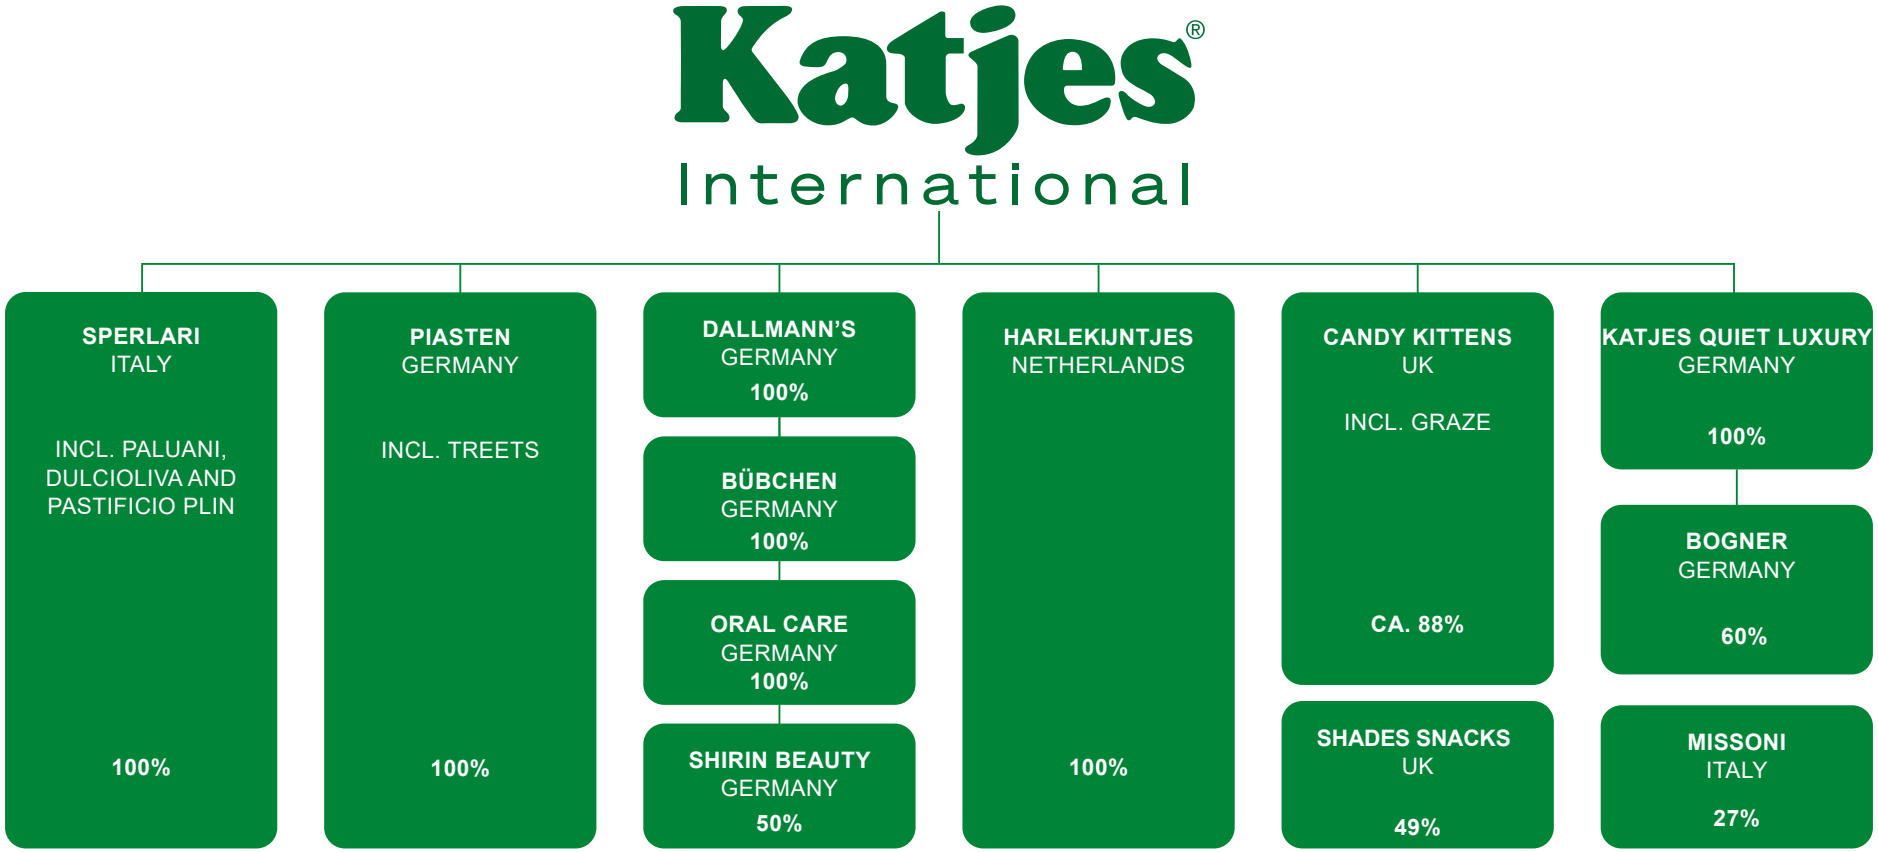

Through continuous investment in brand management, marketing, and communication, their market position is being strengthened – an approach that is also reflected in the positive development of revenue and earnings.

Sustainable and responsible

Acting sustainably and taking responsibility — for society, employees, and the environment alike — are more than just contemporary buzzwords for Katjes International.

As part of a corporate group that has remained family-owned for over 100 years, sustainable practices are deeply ingrained in the company’s culture and represent a natural part of everyday business for all employees.

4.1 OUR SUBSIDIARIES AND PARTICIPATIONS

4.2 TREETS PIASTEN

treets.eu

Since 2017, Treets has been part of Piasten GmbH, Bavaria's largest confectionery manufacturer and Germany's leading producer of chocolate dragees, headquartered in Forchheim. As the orange-colored flagship of the brand portfolio, Treets is increasingly developing into a key growth driver.

Veganuary: Treets Turns Germany Orange

Treets kicked off the year with its largest-ever out-of-home (OOH) campaign. Throughout Veganuary, the vibrant orange Veganistas billboards were impossible to miss across Germany. For four weeks, Treets achieved maximum visibility with 10,000 poster sites at high-traffic locations, increasing awareness of its growing vegan product portfolio significantly.

ISM Cologne: Treets goes 100% VEGAN

Even before arriving at ISM Cologne, visitors were greeted by the vibrant campaign billboards, clearly communicating "Orange is the new vegan."

At the center of the trade fair appearance was a landmark announcement for the brand's future: in spring 2026, Treets will convert its product portfolio to 100% vegan. With this step, Treets sets a clear signal for the future of snacking. Since then, all dragees have been free of animal-derived ingredients. In addition to the vegan news, Treets announced the expansion of its vegan portfolio at ISM with two innovations: Pretzel Bites – the crunchy, gluten-free pretzel balls are coated with vegan ChoViva, a chocolate alternative based on sunflower seeds, and a crunchy sugar shell, perfectly serving the sweet & salty trend.

Treets Buttons featuring the Minions license, created in cooperation with Universal Products & Experiences (UP&E), are colorful lentils consisting of a pastel-colored sugar shell and a core of vegan ChoViva. The Buttons are available in four fun, Minions-themed designs. The two new products exemplify the strategic development of Treets: innovative product concepts combined with clear differentiation through a fully vegan range. In this way, Germany's market leader in the vegan small bites segment continues to expand its position.

Treets named Top-Brand 2026

Another highlight was Treets being named Top Brand 2026 in the Small Bites category by Lebensmittel Zeitung. This is one of the industry's most prestigious awards, presented annually for the most successful brands in their respective product categories.

The award confirms the successful development of the brand and underscores its strong position in the Small Bites segment. It reflects consumers' trust in the brand as well as Treets' consistent focus on innovative products and a clear brand strategy.

4.3 SPERLARI/ PALUANI

sperlari.it

The Group's Italian subsidiary with its long heritage further strengthened its dominant position in the seasonal business.

Since it was set up 190 years ago, Sperlari has established itself as one of the main players in the Italian sugar confectionery market and is one of the market leaders in the segment for seasonal products (nougat), sugar substitutes and sugar-free candy. Its best-known brands include Sperlari (Italian nougat: 'torrone', candies, fruit gums), Saila (liquorice), Galatine (iconic milk tablet), Dietorelle (sugar free and 100% vegan) and Dietor (sweetener).

Launching the 190th anniversary campaign

At the beginning of 2026, to celebrate its 190th anniversary, Sperlari continued its communication journey with the campaign „190 anni, Storie dolci, più la tua" (sweet stories – especially yours). The campaign celebrates the brand's rich heritage while strengthening its presence and engaging consumers. In addition to its media activities, Sperlari reinforced its connection with consumers by sponsoring the "Festival di Sanremo", by far the most-watched TV show and one of the most influential cultural and media events in Italy. The collaboration also generated strong visibility within "Fuori Sanremo" (the media program surrounding the famous Sanremo Festival).

Through this integrated approach combining tradition and modernity, Sperlari is creating new opportunities to engage consumers through moments of sharing, emotion, and connection.

Sperlari seasonals

During the Easter period, Sperlari launched special Easter eggs branded with Sperlari and Zanzibar further strengthening its position in the seasonal chocolate segment. This reflects the company's enduring tradition of sweetness, contemporaneously reimagined.

Paluani 1921

Headquartered in Verona, the company specializes in seasonal baked goods for Christmas and Easter, with a focus on traditional Panettone and Pandoro. The brand, which has existed for more than 100 years, continuously works to enhance the popularity and quality of its products. "Officina Dolciaria Verona": the careful selection of ingredients (Italian fresh milk and eggs as well as the use of real butter), the mastery of artisanal production, and the magic of waiting are the secret behind the quality of Paluani's products. For Easter 2026, Paluani launched a new product: a Colomba enriched with coffee and filled with delicious salted caramel.

4.4 BÜBCHEN BODY CARE

buebchen.de

Thanks to over 60 years of experience and research, Bübchen has become synonymous with particularly gentle skin care for babies and children. The Bübchen range offers a variety of care products tailored to different age groups: Bübchen baby care provides gentle care designed to meet the specific needs of babies' skin from the very first day of life, while the cheerful Bübchen kids care and bath products are ideal for children aged three and above.

Continuous growth

Bübchen recorded encouraging development in the first half of 2026 and is therefore continuing its positive growth trajectory and reinforcing the brand's ongoing relevance among consumers.

Supersanft

Building on the success of the 2025 „Supersanft" campaign, Bübchen continued its successful brand communication with a third campaign flight in February and March 2026. Hip-hop elements and a catchy soundtrack once again formed the creative framework of the campaign. The focus shifted to the positive ÖKO-TEST ratings, highlighting the outstanding quality of Bübchen products and reinforcing the emotional super soft message with credible proof of product excellence.

The four-week campaign achieved a total of 10.8 million impressions, generating high reach and strong attention among the relevant target audience. As a result, Bübchen further strengthened its positioning as a modern and trusted brand while deepening the confidence of young parents.

Continuing growth through community engagement

In spring 2026, Bübchen consistently continued the path of emotional, attention-grabbing brand communication established with "Supersanft." A children's drawing competition centered around Bübchen Kids Shampoo actively involved the community in the design of a Bübchen product. Children aged three to ten were invited to give the iconic Bübchen Hippo a fresh new look - with remarkable success. Numerous creative submissions demonstrated the strong affinity between the target audience and the brand.

The three most popular designs were launched as a limited-edition label series for Bübchen Kids Shampoo, introduced to retail in June.

The edition was very well received by both retail partners and consumers.

Enchanting license launch

With the launch of the new Bübchen x Bibi Blocksberg products, Bübchen is strategically tapping into the current excitement surrounding the new Bibi Blocksberg movie and addressing its target audience with precision.

The three products were launched exclusively at Germany's largest drugstore chain. The range includes a 2-in-1 shampoo and shower gel, a bubble bath, and, as a special new addition, a bath bomb. The product line combines familiar care routines with play, imagination, and the magic of the much-loved world of Bibi Blocksberg.

ORAL CARE / SHIRIN BEAUTY

Theramed Vademecum Antica Erboristeria Licor del Polo Denivit Whitening

Shirinbeauty.com

Bübchen Bodycare – center of expertise for oral care within the Katjes International Group

Since 2022, Bübchen Bodycare GmbH has been part of the Katjes International Group and has since operated as a key center of excellence for dental and oral care. At its long-established site in Viersen, the company develops and produces a broad portfolio of oral-care products, including well-known brands such as Vademecum, Theramed, Antica Erboristeria, and Licor del Polo.

Theramed: Blattgrün against bad breath – new Theramed 2-in-1 toothpaste with natural chlorophyll

Since April, the new Theramed 2-in-1 Blattgrün product has been bringing fresh momentum to the toothpaste category: the innovative 2-in-1 formula combines natural chlorophyll with a 20% antibacterial mouthwash and combats bacteria that can cause bad breath — a benefit that has been scientifically proven. The product further strengthens the brand's freshness positioning while entering a market segment that, despite strong consumer demand, has so far been served by only a limited number of specialized products. (https://theramed.de/products/2in1blattgruen)

Shirin Beauty one year after market launch: Over 6 million products sold

One year after its successful market launch, Shirin Beauty has established itself as a strong player in the German drugstore market. With more than six million products sold and its position as the market leader in the body oil category (excluding private labels), the brand demonstrates its strong consumer appeal. Product quality was further validated by ÖKO-TEST awards for the Blueberry Body Oil and the Blueberry Body Scrub. The latest product launch began in May 2026 with the Shimmering Body Oil, which captured the summer beauty trend with its shimmering finish and was met with strong consumer demand. Just a few weeks later came the Glazed Strawberry Butter Cream body care line, comprising five body care products. As Shirin Beauty's most personal product line to date, it continued the brand's successful growth trajectory throughout the summer of 2026. Inspired by the Lithuanian roots of Shirin David and her sister Pati Valpati, the new fragrance combines a sweet strawberry scent with cherished childhood memories. "Braške" – the Lithuanian word for "strawberry" – is also the family's affectionate nickname and a shared tattoo worn by Shirin, Pati and their mother, symbolizing their close family bond. This authentic story forms the emotional centerpiece of the campaign, which was filmed at the sisters' family home in Lithuania and brought the brand's personal story to life.

4.5 CANDY KITTENS

CANDY KITTENS®

candykittens.co.uk

The UK-based „Candy Kittens family“ has once again grown this year and now comprises the brands Candy Kittens, Shades and Graze. Candy Kittens is the new fashioned confectionery brand, breaking the confectionery mould with its range of plant powered sweets.

Kicking off 2026 with the biggest Veganuary campaign ever

Veganuary launched under a bold new platform, “Candy Kittens Does It Better”. Digitally, a new record with 50m+ impressions has been achieved. In addition, a large billboard in central London was used, and more than 5,000 packs were distributed to consumers.

The biggest launch to date: Smittens

Smittens – a new product line at a more accessible price point – was launched in January as a Tesco Group first-to-market with 1,900 displays, fronted by a 360 campaign starring founder Jamie skydiving to ‘drop’ the range into the UK.

Treets: Nationally listed in under a year

In just under a year, Treets (the first ‘Candy Kittens Introduces’ brand) is now listed in every major UK retailer. Quite impressive for a new brand. Treets consistently expanded its brand presence with a comprehensive brand platform, an eye-catching pop-up store in Canary Wharf, and the launch of its new Pretzel Bites product. The Pretzel Bites are already a top seller in direct sales and the No. 1 chocolate bag on Amazon. Treets is well on its way to fulfilling its mission: bringing vegan chocolate into the mainstream.

graze

Graze is officially part of The Candy Kittens Family as of February 2026

In the UK, Graze is one of the leading brands in the healthy snacking segment and has a strong presence in local food retail. The high degree of overlap between Candy Kittens and Graze in terms of customer base and distribution makes the acquisition an ideal addition to the brand portfolio.

With Graze, Katjes International adds one of the leading better-for-you brands in the UK to its portfolio. The range spans savory innovations, oat-based bars, and convenient on-the-go offerings. High-quality ingredients, balanced recipes, and distinctive flavour combinations define the brand, combining mindful indulgence with a modern lifestyle.

„Better is possible“-Mantra

Graze is a brand with strong equity and awareness in the Healthy Snacking category. Following the acquisition, a strategy sprint was launched to relaunch the brand within 6 months. The relaunch encompasses all elements of the marketing mix (including packaging design, format, and campaign platform).

graze.com

shadesbyniko.com

4.5 CANDY KITTENS

Revived social media

Since this area had been neglected for years, its revival – drawing on Candy Kittens' expertise – was made one of the priorities. The relaunch was placed at the center of the campaign under the platform "100 days to rebuild graze." This platform documents the background of the relaunch on Instagram, LinkedIn, TikTok, and YouTube. The response was phenomenal: 4 million views in the first 2 months and 25,000 new followers.

SHADES BY NIKO

Shades is a joint venture with Niko Omilana, a mega UK YouTuber. Touted as the Biggest Food and Drink launch of 2025, the brand continues its successful journey in 2026.

Shades Pallet Takeover

Shades kicked off the year with something never done before: a whole pallet display of sweets in Sainsbury's stores across the UK.

Shades x Beta Squad: The Beta Five

In February, Shades launched a limited edition developed in collaboration with Beta Squad. The launch was supported by a coordinated campaign that included a launch trailer, influencer activities, a giveaway of signed products, and targeted subscriber outreach. Founded in 2019, Beta Squad consists of five British YouTubers who together reach more than 10 million subscribers.

A social ad bigger than the Super Bowl

At the same time, Shades' biggest social collaboration to date came through a partnership with 'United Strand', a viral Manchester United fan who had been documenting his refusal to cut his hair until the club won five games in a row. The resulting campaign generated over 50 million views and 4 million likes across platforms – comparable reach to Super Bowl commercials airing the same weekend.

World Cup Fever sells 2.5m packs in 6 weeks

Shades then launched its World Cup inspired on-pack promotion: „Find A Football, Get A Goal". Manchester United player Bruno Fernandes appeared in the launch trailer, generating over 10 million views at an average engagement rate of 15.5%. In addition, major national media outlets such as SPORTbible reported on the promotion. The 2.5 million promotional packs sold out in under 6 weeks.

4.6 BOGNER

Bogner.com

Since 1932, BOGNER has combined a timeless, sporty style with elegance and functionality. The first half of 2026 was marked by important strategic decisions: Arne Freundt, the former CEO of Puma, and an internationally experienced executive, assumed leadership of the company. The brand's positioning as a luxury sportswear brand was consistently sharpened, a new retail concept for the mono-brand stores was developed, and the expansion of its presence in Asia – particularly in China – was pursued in a targeted manner.

New CEO: Arne Freundt

Since June 1, 2026, Arne Freundt has been responsible for BOGNER's future direction as CEO. The former PUMA CEO brings extensive international experience in brand management, retail, and sport lifestyle. His main objective will be the further development of the brand – from its sharpened luxury positioning to international expansion.

Strengthening the brand's positioning in the luxury segment

To mark the 100th anniversary of the Suvretta Ski School, BOGNER, together with the legendary Suvretta House in St. Moritz, realized an extraordinary project: 100 ski instructors in a spectacular night descent illuminated by LED lights – a visual spectacle that resonated worldwide.

New store concept for the mono-brand stores

Together with the renowned architect and designer Matteo Thun, BOGNER is developing a new store design for the mono-brand stores, translating the strengthened luxury positioning to the point of sale.

Thun's signature style – high-quality, natural materials, a clear, modern design language and alpine design elements – creates a brand experience on par with international luxury houses. More space for showcasing heritage and capsule collections, and a consistent focus on desirability.

Expansion of presence in Asia

Asia, and China in particular, are among BOGNER's strategic growth markets. In the first half of 2026, the groundwork was laid for a consistent expansion of the brand's presence. In doing so, the brand benefits from the pronounced affinity of Chinese consumers for the alpine lifestyle and winter sports – a dynamic that has persisted since the Beijing Winter Olympics and is driving structural growth in the premium and luxury ski apparel segment. The China business is being pursued as a joint venture together with Bosideng, the world's largest manufacturer of down jackets.

II. GROUP INTERIM MANAGEMENT REPORT AS AT JUNE 30, 2026

(TRANSLATION FROM THE GERMAN LANGUAGE)

1. **Fundamentals of the group**
2. **Company-specific events**
3. **Revenue, earnings, financial position and net assets**
4. **Opportunities and risks report**
5. **Forecast report**

1. FUNDAMENTALS OF THE GROUP

1.1 Business model

Katjes International GmbH & Co. KG (hereinafter also referred to as "Katjes International", "the Company", or "the Group") has operated as a strategic investor for over a decade and regards itself as a brand holding company. Together with its sister companies Katjes Fassin GmbH + Co. KG ("Katjes Germany") and Katjesgreenfood GmbH & Co. KG ("Katjesgreenfood"), the Company forms the Katjes Group. All three companies are legally independent entities. With a focus on the European consumer goods market, Katjes International, as a brand holding company, holds a broad portfolio of investments. In doing so, the Company concentrates on brands that are strong and established in their respective home markets.

This interim consolidated financial statements relate exclusively to Katjes International and its subsidiaries and participations.

1.2 Strategy and objectives

Katjes International pursues the goal of further expanding its position with a focus on Consumer Goods in Europe. To this end, the Company acquires strong brands, develops them consistently, leverages the resulting synergy benefits, and pursues further growth. Katjes International also sees itself as a carve-out investor that acquires divisions of large corporations which, for example, have fallen below critical mass for the respective multinational group. Significant examples include the acquisition of Bübchen from Nestlé/Galderma in 2020 and the acquisition of the Oral Care business from Henkel AG & Co. KGaA ("Henkel") in 2022.

The acquisition of the majority interest in Bogner in September 2025 and the acquisition of Graze from Unilever in February 2026 underscore this strategic approach, as does the acquisition of approximately 27% of the shares in Missoni S.p.A. completed in May 2026. All transactions highlight Katjes International's focus on acquiring and further developing established consumer goods brands with growth potential.

Katjes International fundamentally pursues a long-term and sustainable acquisition approach. Following an acquisition, the investee companies remain legally and organizationally independent and retain their local management. This ensures that expertise and understanding of individual local market conditions are preserved.

To make the subsidiaries more successful and profitable in the long term, Katjes International supports them with two strategic pillars:

- A continued focus on strong brands, brand names and products.
- Alignment of the product portfolios with a sustainable, future-oriented approach.

In addition, i. a. the following synergy effects are created:

- **Purchasing synergies:** The entities of the Katjes Group are mainly active in the European consumer goods market. With regional proximity and oftentimes identical raw materials, the Group creates synergy effects in purchasing.

- **Distribution synergies:** Using identical or similar distribution channels for different brands allows to achieve synergies in distribution. Good market positions and long-standing customer relationships support the distribution of the Group's various products and lead to cross-selling effects.

With its extensive experience in the acquisition of brands and companies, the management team of Katjes International continuously reviews new, suitable acquisition targets. The premise

applied is that these should be strong consumer goods brands with development potential – from the perspective of Katjes International's management – and a focus on Europe. It is not excluded that potential acquisition targets may also serve markets outside Europe.

1.3 Organisation

As of June 30, 2026, Katjes International held, through various intermediate holding companies, all shares in the German companies Piasten, Dallmann's, Bübchen Body Care and Bübchen Oral Care, as well as Sperlari, Paluani and Pastificio Plin in Italy and Harlekijntjes in the Netherlands. Katjes International indirectly holds approximately 88% of the British company Candy Kittens and 75% of the Italian company Dulcioliva, in each case with the option to acquire the remaining outstanding shares. Katjes International holds 60% of the German Bogner Group, acquired on September 1, 2025. In 2024, a joint venture was established with entrepreneur and musician Shirin David, in which Katjes International holds 50%. There is furthermore a joint venture with the well-known YouTuber and influencer Niko Omilana in the United Kingdom, in which a 49% stake is held. During the reporting period, Katjes International acquired 100% of Nature Delivered Ltd. ("Graze") in the United Kingdom, as well as 27% of the iconic luxury brand Missoni in Italy. Internal management and reporting within the Katjes International Group is conducted exclusively at Group level.

1.4 Market positions

In the first half of the financial year 2026, the market positions of the associated companies generally ranged from stable to positive.

- With its Dallmann's sage coughdrops, the Germany-based company Dallmann's Pharma Candy (part of Katjes International since 2012) is the leader in German pharmacies in terms of number of packets sold.
- In Germany, Piasten has been part of Katjes International's portfolio since 2014. Piasten is one of the largest German producers of chocolate dragees and launched the brand 'Treets' on the German market in 2018.
- Since 2016, Katjes International has held all shares in the Dutch company Harlekijntjes, which makes the country's best-selling liquorice product (based on volume).
- In Italy, Sperlari has been part of Katjes International since 2017. Sperlari is one of the largest players in the Italian sugar confectionery market and one of the market leaders in the segment for seasonal products, sweeteners and sugar-free sweets.
- With Candy Kittens, Katjes International holds a majority stake in one of the UK's fastest growing gourmet confectionery brands.
- Bübchen, the market leader in Germany's baby and kids care segment, has been part of Katjes International since May 2020.
- Dulcioliva, which has been owned by Katjes International since June 2021, is one of the leading producers of 'Cuneesi' pralines, a speciality chocolate product from Piedmont.
- Paluani, a well-known producer of panettone in Italy, has been part of Katjes International since August 2022.
- The oral care business acquired from Henkel, which includes the trademarks for Theramed, Vademecum, Licor del Polo, Antica Erboristeria and Denivit, has been part of Katjes International since December 2022. The different brands, which focus on natural ingredients and producing organic products, are particularly well-represented in Germany, Italy, France and Spain. For instance, Vademecum is the leading organic toothpaste in France.
- The company acquired the cosmetics brand Barnängen for the focus markets Germany, Austria, the Czech Republic, Switzerland and Hungary in April 2024. Barnängen, a traditional Swedish brand, was founded in Stockholm in 1868 by the Swedish merchant Johan Wilhelm Holmström.
- On September 1, 2025, a 60% interest in the Bogner Group was acquired. The internationally active Bogner Group is the largest family-owned luxury apparel brand in Germany.
- Since the end of February 2026, the Italian company Pastificio Plin has been part of the Katjes International Group. Based in Villanova d'Albenga in Liguria, the company stands for high-quality fresh Italian pasta and is particularly known for its ravioli filled with locally grown "Borragine di Albenga" (Albenga borage) and Italian ricotta.
- Nature Delivered Ltd., based in London and acquired in Febru-

ary 2026, is one of the leading providers in the British "healthy snacking" segment with its brand "Graze" and a diverse range of innovative products.

- The approximately 27% stake acquired in May 2026 in Missoni S.p.A., based in Sumirago, adds a globally renowned Italian luxury brand to the portfolio, known in particular for high-quality fashion and homeware featuring its distinctive zigzag design.

1.5 Overall economic development and market environment

In the first half of 2026, Katjes International was active through its investments primarily in the markets of Germany, the United Kingdom, Italy, Switzerland, the Netherlands, North America, Austria, France and Spain. The consumer goods sales markets that are material for the Group, among others, are generally characterised by low cyclicality and high resilience to economic fluctuations. This was also observed in the first half of 2026.

In its "Economic Outlook" published in June 2026, the OECD forecast slow growth for 2026 in the eurozone, which is particularly relevant for Katjes International. Gross domestic product (GDP) is expected to increase overall by 0.8% (2025: 1.4%). For the German economy, positive development is expected, with growth of 0.7% (2025: 0.3%). The United Kingdom is expected to develop somewhat less dynamically than in the previous year, with an increase of 0.9% (2025: 1.4%) and the Italian economy remains stable at 0.5% (2025: 0.5%). The Swiss economy is also slightly declining, with growth of 1.1% compared to the previous year (2025: 1.3%). The Netherlands' GDP growth for 2026 is expected to be 1.0% (2025: 1.8%). The United States shows good growth with a GDP increase of 2.0%, although slightly below the previous year's growth (2025: 2.1%). Austria's GDP is recovering with an increase of 0.7% (2025: 0.6%). France, the second-largest economy in the eurozone, is showing a slight decline at 0.7% (2025: 0.9%).

Spain is recording a solid, albeit slower GDP growth of 2.2% (2025: 2.8%).

(OECD, June 2026 | OECD Economic Outlook | OECD iLibrary (oecd-ilibrary.org))

Consumer goods remain non-cyclical

Consumer goods sales markets are largely characterised by low cyclicality and high resilience to economic fluctuations, which is confirmed by the current figures for the ongoing year 2026.

Confectionery market remains resilient

Growth in the European confectionery market (sugar confectionery and chocolate products) confirms this resilience: growth of 7.4% is forecasted for Western Europe and 5.4% for Eastern Europe in 2026.

Expert forecasts (Euromonitor International) expect the European confectionery market (sugar confectionery and chocolate products) to continue growing to a volume of over EUR 115 billion by 2030.

Consumer behaviour in the confectionery markets continues to be characterised by increasing health awareness combined with high price sensitivity: while sales volumes stagnate or decline slightly in the largely saturated markets, price increases, premiumisation, and innovative product concepts are driving moderate revenue growth. Consumers are increasingly demanding sugar-reduced, vegan, and functional products, as well as natural and transparently declared ingredients, without compromising on indulgence. On the raw materials side, risks arise primarily from ongoing cost inflation along the supply chain, as well as increasing requirements regarding alternative ingredients, responsible sourcing, and sustainable packaging. Opportunities arise in particular from health-oriented formulations, plant-based alternatives, functional ingredients, premium products, and target-group-specific innovations. Set against this are risks from an increasing shift towards private labels and discounters, growing regulatory pressure on sugar content, and consumers' limited willingness to accept further price increases.

Baby & kids body care market

The market for baby and children's care products represents a stable segment in Germany. Bath and washing products, shampoos, sun care, care creams, and baby oil are part of everyday essential needs and are characterised by stable demand. According to Nielsen data, the market volume in Germany

amounted to EUR 295 million in the first half of 2026, comparable to the level of the prior-year period.

The oral care market shows a slight increase

Dental and oral care products are one of the most important product categories in the body care consumer goods segment in Germany. Revenue from products in this category are expected to amount to approximately EUR 2.36 billion for 2026 and, according to Euromonitor data, thus show an increase of 4.2% compared to the previous year.

Luxury fashion

According to Euromonitor data, the designer apparel market in Germany shows growth of 3.8% for 2026.

2. COMPANY-SPECIFIC EVENTS

2.1 Katjes International

In the financial year 2026, Katjes International continues its long-term acquisition strategy. In February 2026, 100% of the shares in London-based Nature Delivered Ltd. ("Graze") were acquired via the subsidiary Future Snacks Ltd. This was followed in May 2026 by the acquisition, via Katjes International's wholly owned subsidiary Katjes Quiet Luxury, of approximately 27% of the shares in Missoni S.p.A. In connection with the Missoni transaction, the existing corporate bond was increased by EUR 15 million to a total of EUR 200 million. In addition, Katjes International was granted a call option over further shares held by the majority shareholder, the exercise of which would enable Katjes International to acquire a majority interest.

In addition, at the end of February 2026, all shares in Villanova d'Albenga-based Pastificio Plin S.r.l. were acquired.

3. REVENUE, EARNINGS, FINANCIAL POSITION AND NET ASSETS

3.1 Revenue and earnings

In the first six months of the financial year 2026, Katjes International's Group revenue amounted to EUR 256.0 million (6M 2025: EUR 164.8 million), representing an increase of EUR 91.2 million compared to the previous year.

When assessing revenue development in the first half of the year, the seasonal nature of Katjes International's business must be taken into account. The second half of the year remains the period with significantly higher revenue and is decisive for full-year performance. While the acquisitions in the Personal Care segment as well as the acquisition of Graze contribute to a more even distribution of revenue during the current year, the inclusion of the likewise strongly seasonal Bogner companies significantly counteracts this effect.

During the first half of 2026, Katjes International generated 35.3% of revenue (6M 2025: 34.7%) in Germany. The second most important individual market was the United Kingdom with 14.8% (6M 2025: 6.5%), followed by Italy with 13.5% (6M 2025: 21.7%), Switzerland with 9.6% (6M 2025: 9.2%), and the Netherlands with 3.4% (6M 2025: 5.1%). Revenue in North America contributed 2.8% (6M 2025: 1.5%), and revenue in other EU member states contributed a total of 15.5% (6M 2025: 20.6%) to Group revenue. In line with the Company's strategic focus, the Group generated only a small proportion of its Group revenue, 5.1% (6M 2025: 0.8%), in other countries outside the EU. The increase in revenue in North America is attributable to the revenue of the Bogner companies in the USA and Canada, which have been included since September 1, 2025.

The most important product groups in the first six months of the financial year 2026 were once again "sugar confectionery", followed by "bodycare products", with "seasonal products" in third place in the first half of the year and "chocolate" in fourth place. Katjes International generated 34.3% of revenue (6M 2025: 47.1%) from "sugar confectionery" and 19.5% (6M 2025: 28.8%) from care products. The "seasonal products" category contributed 12.5% (6M 2025: 2.5%) to Group revenue, and the "chocolate" category contributed 7.9% (6M 2025: 13.9%). The revenue for the prior year period for the "seasonal products" segment is not comparable due to the first-time contributions from the Bogner companies in the first half of 2026. The product portfolio continued to be optimised during the reporting period and was targeted specifically for the positioning in the individual markets.

Cost of sales increased disproportionately less relative to revenue compared with the previous year, rising to EUR 189.3 million (6M 2025: EUR 126.7 million). Accordingly, the share of cost of sales in revenue improved, at 73.9% (6M 2025: 76.9%) and was below the prior-year level.

Gross profit reached approximately EUR 66.7 million in the first half of 2026 (6M 2025: EUR 38.1 million). The gross margin was 26.1% (6M 2025: 23.1%).

Katjes International's selling expenses of EUR 50.1 million increased significantly compared with the previous year (6M 2025: EUR 17.8 million) – mainly due to the contribution of the Bogner companies.

Administrative expenses, at EUR 40.9 million (6M 2025: EUR 19.9 million), were above the figure for the first six months of the previous year. Here too, the administrative expenses of the Bogner companies, included since September 1, 2025, had a material effect.

Other operating result, at EUR 17.5 million (6M 2025: EUR 3.3 million), was above the prior-year result. In the reporting period,

this item includes the positive results from the purchase price allocations carried out during the first half of 2026 (EUR 13.8 million) and income from the two joint ventures as well as from the equity-accounted investment in Missoni (EUR 1.9 million; 6M 2025: EUR 0.7 million). In addition, this item includes income from the reversal of provisions as well as other, in part non-period, expenses and income, including expenses arising from damage caused by third parties.

Operating result stood at EUR -6.8 million (6M 2025: EUR 3.7 million), and has thus declined compared with the prior-year period. This is due, on the one hand, to the seasonality of the Bogner companies, whose earnings strength is traditionally greater in the second half of the year. In addition, damage caused by third parties occurred in two instances during the reporting period, which had a negative impact on the operating result. In both cases, insurance coverage or a right of recourse generally exists. At the time of publication of this report, these matters are being processed and should be resolved during the course of the second half of the year, which would have a correspondingly positive effect on the second half of the year.

Earnings before interest, taxes, depreciation and amortisation (EBITDA) – the key management metric for the Group – stood at EUR 15.8 million (6M 2025: EUR 13.9 million), above the prior-year period. As a result, the EBITDA margin – likewise a key management metric for Katjes International – reached 6.2% (6M 2025: 8.4%). Due to the aforementioned seasonality of the business, the second half of the year continues to represent the significantly stronger half of the year.

The financial result amounted to EUR -11.2 million (6M 2025: EUR -4.1 million). The decline was attributable, in addition to the increase in the Katjes International bond and acquisition financing (in connection with the acquisition of Bogner, the investment in Missoni and the acquisition of Graze), to the inclusion of the Group's share of the results of an equity-accounted investment (reporting period: EUR -0.4 million; 6M 2025: EUR 1.9 million).

During the reporting period, Katjes International recorded tax income of EUR 2.1 million (6M 2025 tax expense: EUR 0.6 million).

Profit before tax declined to EUR -18.0 million (previous year: EUR -0.4 million). Correspondingly, profit after tax decreased by EUR 14.9 million compared with the previous reporting period to EUR -15.9 million (6M 2025: EUR -1.0 million).
Profit attributable to non-controlling interests amounted to EUR -7.8 million in the reporting period (6M 2025: EUR 0.0 million). Profit attributable to the shareholders of Katjes International thus amounted to EUR -8.1 million (6M 2025: EUR -1.0 million).

3.2 Financial position

In the first half of the financial year 2026, cash flow from operating activities amounted to EUR 1.1 million (6M 2025: EUR -9.8 million). The increase is mainly attributable to seasonal movements in net working capital (primarily trade receivables) and, on the other hand, to reporting-date-related fluctuations both as at June 30 of the reporting year and as at June 30 of the previous year.

Cash flow from investing activities amounted to EUR -96.4 million in the first half of 2026 (6M 2025: EUR -7.0 million). This figure mainly reflects the purchase price payments for the acquisitions of Graze and Missoni. In addition, investments in property, plant and equipment and intangible assets in connection with the operating activities of the subsidiaries are reported here.

Cash flow from financing activities totalled EUR 22.6 million in the first half of 2026 (6M 2025: EUR 1.2 million). The increase compared with the first six months of the previous year is mainly attributable to the increase in the 2023/2028 bond in connection with the acquisition of Missoni, as well as the raising of new loans during the reporting period, which were not fully offset by regular repayments.
Overall, developments in the first six months of 2026 led to a reduction in cash and cash equivalents compared with Decem-

ber 31, 2025 of EUR 72.7 million, to a total of EUR 74.1 million. Compared with the first half of the previous year, cash and cash equivalents increased (6M 2025: EUR 38.4 million).

3.3 Net assets

Katjes International's consolidated total assets increased to EUR 850.9 million as at June 30, 2026 (December 31, 2025: EUR 812.3 million), which is mainly attributable to the acquisitions made during the reporting period, offset by seasonal fluctuations.

On the assets side, non-current assets increased by EUR 125.6 million to EUR 590.2 million (December 31, 2025: EUR 464.6 million). These include in particular land, buildings and machinery, the investment in Missoni S.p.A., right-of-use assets and the capitalised brands of the subsidiaries. Total property, plant and equipment increased by EUR 12.9 million (December 31, 2025: EUR 148.3 million), which is mainly attributable to the initial consolidation of the companies acquired during the reporting period as well as investments in technical equipment and machinery. Right-of-use assets from lease agreements under IFRS 16 amounted to EUR 85.1 million as at June 30, 2026 (December 31, 2025: EUR 74.5 million). Here too, the inclusion of the right-of-use assets of Graze, acquired in the first half of the year, plays a significant role. Intangible assets were reported at EUR 257.3 million as at June 30, 2026 (December 31, 2025: EUR 218.7 million); the increase is mainly attributable to the Graze brand recognised in the Group as part of the purchase price allocation. Other financial assets amounted to EUR 15.9 million (December 31, 2025: EUR 5.6 million). Deferred tax assets amounted to EUR 14.8 million (December 31, 2025: EUR 13.2 million).

Current assets decreased and stood at EUR 260.7 million after the first six months of 2026 (December 31, 2025: EUR 347.7 million). In addition to the reduction in cash and cash equivalents – driven by the investments made during the reporting period – the largest change occurred in trade receivables and other assets, which decreased, mainly due to seasonal effects offset by the inclusion of the receivables of the subsidiaries consolidated for the first time in the first half of the year, by EUR 16.2 million to EUR 84.4 million (December 31, 2025: EUR 100.6 million).

Inventories increased by EUR 3.1 million to EUR 100.2 million (December 31, 2025: EUR 97.1 million), partly reflecting the inventories of the newly consolidated Graze.

Cash and cash equivalents decreased to EUR 74.1 million (December 31, 2025: EUR 146.8 million).

On the liabilities and equity side, Group equity declined slightly to EUR 255.1 million (December 31, 2025: EUR 266.9 million). Taking into account the increased total assets, the equity ratio remained generally stable at 30.0% (December 31, 2025: 32.9%). Equity attributable to shareholders amounted to EUR 214.8 million (December 31, 2025: EUR 219.4 million). Non-controlling interests were reported at EUR 40.3 million (December 31, 2025: EUR 47.5 million) and mainly comprise the interests of the minority shareholders of the Bogner Group.

Non-current liabilities of EUR 404.8 million (December 31, 2025: EUR 349.4 million) increased, among other things, due to the increase in the bond in connection with the acquisition of Missoni as well as acquisition financing for part of the purchase price of Graze, and mainly comprise financial liabilities relating to the corporate bond, long-term bank loans, financial liabilities from lease agreements under IFRS 16, deferred tax liabilities, and provisions for pensions and similar obligation.

As part of non-current liabilities, non-current financial liabilities amounted to EUR 325.7 million (December 31, 2025: EUR 278.5 million). In addition to the acquisition-related financing mentioned above, the increase is attributable to the inclusion of Graze and its IFRS 16 liabilities. In addition, the purchase option resulting from the future acquisition of the minority interests in Dulcioliva is reported here as a liability. This was recognised in full as a liability as at the balance sheet date due to the continued likelihood of exercise. Since the initial consolidation of Bogner, this item has also included a liability arising from a put option held by the minority shareholders, granting them the right to sell part of their shares to the Group.

Deferred tax liabilities increased in connection with the purchase price allocations carried out in the first half of the year, to EUR 59.8 million (December 31, 2025: EUR 52.4 million).

As at June 30, 2026, non-current provisions, at EUR 2.9 million, were at a similar level to December 31, 2025 (EUR 2.4 million). Provisions for pensions and similar obligations also remained constant at EUR 16.4 million as at June 30, 2026 (December 31, 2025: EUR 16.1 million).

Current liabilities decreased by EUR 5.0 million to EUR 191.0 million (December 31, 2025: EUR 196.0 million). The utilisation of a large portion of the current provisions recognised as at the previous reporting date, which amounted to EUR 16.9 million as at June 30, 2026 (December 31, 2025: EUR 33.5 million), was the main contributor to this decrease. The decrease in trade payables and other liabilities of EUR 4.5 million to EUR 79.6 million (December 31, 2025: EUR 84.1 million) also contributed to this decline. Conversely, current interest-bearing and non-interest-bearing financial liabilities increased, primarily due to the drawing of new short-term credit lines and the inclusion of Graze's lease liabilities under IFRS 16, by EUR 16.7 million to EUR 91.0 million (December 31, 2025: EUR 74.3 million).

3.4 Non-financial performance indicators

As a strategic investor in the consumer goods sector, non-financial performance indicators, alongside financial ones, play a significant role for Katjes International. Key topics here include, in particular, employee satisfaction, certifications, brand awareness, and the sustainable orientation of the Company and its investee companies.

In the first half of 2026, the Company employed an average of 1,787 employees (6M 2025: 1,118). The majority worked in Germany (63%), followed by Italy (21%) and the United Kingdom (11%).

Personnel expenses in the first half of the 2026 financial year amounted to EUR 68.0 million (6M 2025: EUR 37.2 million).

For further information on the non-financial performance indicators, please refer to the disclosures in the 2025 consolidated financial statements (pages 28 to 29).

4. OPPORTUNITIES AND RISKS REPORT

In the first half of the year, no significant changes occurred in the opportunities and risks compared with the 2025 consolidated financial statements – either with regard to the probability of occurrence or with regard to the possible positive and negative effects on Katjes International and its subsidiaries. With respect to the opportunities and risks as well as the risk management and control systems for Katjes International, the Company refers to the 2025 consolidated financial statements (pages 30 to 34). From the perspective of management, no risks threatening the Company's continued existence are identifiable at present or in the foreseeable future.

5. FORECAST REPORT

Overall economic development in the eurozone and the United Kingdom is viewed as cautiously positive. Following a slight recovery in 2025, the OECD's current outlook (June 2026) forecasts an increase in economic output of 0.8% for the eurozone in 2026. Germany's economy is expected to grow slightly by 0.7% in 2026, while growth of 0.9% is forecast for the United Kingdom. The Italian economy is projected to grow by 0.5% in 2026. Growth of 1.1% is forecast for Switzerland, 1.0% for the Netherlands, 2.0% for the United States, 0.7% for Austria and 0.7% for France. Spain is expected to record growth of 2.2%.

Katjes International will continue to pursue its proven strategy for the remainder of 2026: this includes promoting the organic growth of the Group's subsidiaries as well as further investments with a focus on strong consumer goods brands and an emphasis on Europe. At the same time, the Company aims to leverage further synergies within the Group. To this end, the Company continuously reviews suitable acquisition targets in its target regions.

The Company sees various business opportunities arising in particular from succession situations, corporate carve-outs as part of portfolio streamlining, and from the ongoing consolidation of the market. As a general rule, the Company continuously evaluates interesting acquisition opportunities and is regularly involved in various stages of initiation or negotiation.

The Company continues to expect to achieve its previously communicated target of total revenue of at least EUR 650 million and an EBITDA margin of 10% – 12%.

IV. NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(TRANSLATION FROM THE GERMAN LANGUAGE)

1. **Information on the group**
2. **Summary of material accounting policy information**
3. **Business combinations and other transactions**
4. **Selected notes to the statement of comprehensive income**
5. **Selected notes to the balance sheet**
6. **Segment reporting**
7. **Commitments to purchase property, plant and equipment**
8. **Transactions with related parties**
9. **Events after the balance sheet date**

1. INFORMATION ON THE GROUP

Katjes International GmbH & Co. KG ('Katjes International') is a limited partnership (Kommanditgesellschaft) established under the laws of the Federal Republic of Germany. It is registered in the Commercial Register of the Kleve Local Court (Amtsgericht) under commercial register number HRA 1076. The registered office is Emmerich am Rhein. The business address is:

Dechant-Sprünken-Str. 53-57
46446 Emmerich am Rhein, Germany.

2. SUMMARY OF MATERIAL ACCOUNTING POLICY INFORMATION

2.1 Basis of preparation of the financial statements

The interim financial statements have been prepared in millions of euros. Unless otherwise indicated, all amounts in the notes are also stated in millions of euros (EUR million). Rounding has been performed in accordance with standard commercial rounding rules. Due to rounding, tables and cross-references may contain minor discrepancies.

The interim financial statements of Katjes International GmbH & Co. KG and its subsidiaries have been prepared in accordance with IAS 34 Interim Financial Reporting.

The interim financial statements do not contain all the information and disclosures required for annual consolidated financial statements. They should therefore be read in conjunction with the consolidated financial statements as at December 31, 2025. These interim consolidated financial statements have neither been audited nor reviewed by the auditor.

The accounting policies and measurement methods applied in the interim financial statements correspond to those applied in the consolidated financial statements as at December 31, 2025. The only exceptions are new and amended standards that are mandatorily applicable from January 1, 2026.

No new standards came into effect during the current reporting period whose introduction has a material impact on the Group's accounting policies. The amendments to IFRS 9 and IFRS 7 that came into effect on January 1, 2026 had no material impact on these financial statements.

Accounting standards not yet applied

The following accounting standards have already been adopted into EU law but are not yet required to be applied in the 2026 financial year, and have not been voluntarily adopted early: IFRS 18 and IFRS 19 (applicable for financial years beginning on or after January 1, 2027).

Aside from the presentation changes required under IFRS 18, no material effects on the consolidated financial statements are expected from the aforementioned accounting standards not yet applied.

3. BUSINESS COMBINATIONS AND OTHER TRANSACTIONS

In the reporting period, Katjes International expanded its investment portfolio through three acquisitions. In early February 2026, 100% of the shares in Nature Delivered Ltd., London, United Kingdom, and thus the British brand "Graze" (hereinafter "Graze"), were acquired via the subsidiary Future Snacks Ltd., London, United Kingdom. This was followed at the end of February 2026 by the acquisition of all shares in the Italian company Pastificio Plin S.r.l., Villanova d'Albenga, Italy. In May 2026, Katjes International also acquired, via its wholly owned subsidiary Katjes Quiet Luxury GmbH, Düsseldorf, Germany, approximately 27% of the shares in the Italian luxury brand Missoni S.p.A. In connection with the Missoni transaction, the existing corporate bond was increased by EUR 15 million to a total of EUR 200 million.

Acquisition of Nature Delivered Ltd.

The Company generated revenue of approximately GBP 35 million in the financial year 2025 and was profitable.

The fair values of Graze's identifiable assets acquired and liabilities assumed at the date of initial consolidation, in accordance with the preliminary purchase price allocation, are presented in the following table.

in EUR million	Feb. 2, 2026
Assets	
Property, plant, equipment	10.4
Right-of-use assets	8.0
Intangible assets	40.5
Inventories	2.5
Trade receivables and other assets	0.8
Cash and cash equivalents	0.0
Liabilities	
Financial liabilities	8.9
Provisions	0.5
Trade payables and other liabilities	1.5
Deferred tax liabilities	8.3
Purchase price	31.8
Badwill	**11.2**

At the time of the initial consolidation, in accordance with the preliminary purchase price allocation, a badwill of EUR 11.2 million was recognised through profit or loss in other operating income. Prior to recognition, a further assessment was carried out with regard to the completeness and accuracy of the recognition of all assets acquired and liabilities assumed. External assessors were engaged for the valuation of property, plant and equipment. The difference arose mainly from the competitive situation and the resulting advantageous position for the Katjes International Group.

Acquisition of Pastificio Plin S.r.l.

In the past financial year, the company generated revenue of approximately EUR 4 million and was profitable.

The fair values of Pastificio Plin's identifiable assets acquired and liabilities assumed at the date of initial consolidation, in accordance with the preliminary purchase price allocation, are presented in the following table.

in EUR million	Feb. 27, 2026
Assets	
Property, plant, equipment	2.8
Intangible assets	1.8
Other non-current assets	0.1
Inventories	0.2
Trade receivables and other assets	0.8
Cash and cash equivalents	0.1
Liabilities	
Financial liabilities	0.9
Provisions	0.3
Trade payables and other liabilities	1.0
Deferred tax liabilities	0.6
Purchase price	0.4
Badwill	**2.6**

At the time of the initial consolidation, in accordance with the preliminary purchase price allocation, a badwill of EUR 2.6 million was recognised through profit or loss in other operating income. Prior to recognition, a further assessment was carried out with regard to the completeness and accuracy of the recognition of all assets acquired and liabilities assumed. External assessors were engaged for the valuation of property, plant and equipment. The difference was primarily attributable to the structure of the sale process and the size of the company.

The presentation of the pro forma profit or loss of both acquisitions for the reporting period has been omitted as reliable determination of this information would only have been possible with disproportionate effort.

4. SELECTED NOTES TO THE CONSOLIDATED STATEMENT OF COMPREHENSIVE INCOME

4.1 Personnel expenses

in EUR million	6M-2026	6M-2025
Wages and salaries	55.0	28.9
Social security contribution	11.8	7.1
Expenses for retirement benefits	1.2	0.9
Other personnel expenses	0.0	0.3
Total	**68.0**	**37.2**

The average number of employees in the reporting period was:

	6M-2026	6M-2025
Blue-collar workers	803	710
Salaried employees	946	388
Other	38	20
Total	**1,787**	**1,118**

In addition, the Group employed an average of 140 temporary workers (6M 2025: 154).

4.2 Auditor's fees

The following fees paid to the auditor of the consolidated financial statements were recognised as expenses incurred by the Group:

in EUR million	6M-2026	6M-2025
Fees for audit services	0.0	0.0
Tax consultancy services	0.0	0.0
Other services	0.0	0.0
Total	**0.0**	**0.0**

4.3 Taxes on income

in EUR million	6M-2026	6M-2025
Current tax expense/income:		
Germany	-0.7	-2.0
Other countries	-0.5	-0.2
Deferred tax expense/income:		
Germany	0.8	0.2
Other countries	2.5	1.4
Total	**2.1**	**-0.6**

5. SELECTED NOTES TO THE CONSOLIDATED BALANCE SHEET

5.1 Investments accounted for using the equity method

In the reporting period, the carrying amount of the investments valued at equity changed as follows:

in EUR million	
Carrying amount as at January 1, 2026	4.3
Additions	50.1
Result for the period	1.5
Carrying amount as at June 30, 2026	**55.9**

As at June 30, 2026, Katjes International holds approximately 45% in Bogner GCA Holding PTE. Ltd., Singapore, as well as, since May of the reporting period, approximately 27.3% in Missoni S.p.A. In addition, two joint ventures within the meaning of IFRS 11 are presented here. In accordance with IAS 28, these are measured accordingly and reported together with associates under the item "investments accounted for using the equity method". These comprise the joint venture with entrepreneur Shirin David – Shirin Beauty – and a UK-based joint venture – Shades Snacks – with the well-known YouTuber Niko Omilana.

5.2 Inventories

Value adjustments (reversals) on inventories were recognised in the amount of EUR 1.0 million (6M 2025: EUR -0.4 million).

5.3 Cash and cash equivalents

in EUR million	June 30, 2026	Dec 31, 2025
Balances at banks and cash on hand	74.1	146.8
Total	**74.1**	**146.8**

The carrying amount of cash and short-term deposits corresponds to their fair value. As at June 30, 2026, cash and cash equivalents held in foreign currency by subsidiaries reporting in foreign currency (GBP) are reported at an equivalent value of EUR 2.8 million (December 31, 2025: EUR 0.5 million), and cash and cash equivalents held by subsidiaries reporting in other foreign currencies (mainly RUB, CHF, USD) are reported at an equivalent value of EUR 8.6 million (December 31, 2025: EUR 10.6 million).

5.4 Interest-bearing and non-interest-bearing financial liabilities

Interest-bearing and non-interest-bearing financial liabilities mainly comprise the corporate bond, other interest-bearing loans, and lease liabilities. As at June 30, 2026, lease liabilities amounted to a total of EUR 85.8 million (December 31, 2025: EUR 74.7 million).

5.5 Financial instruments by category

June 30, 2026 in EUR million	Carrying amount	Fair value	IFRS 9 measurement
Financial assets:			
Other financial assets[3]	0.2	0.2*	FV OCI
Other financial assets[1]	7.4	7.4**	Amortised cost
Option[3]	7.6	7.6*	FV PL[a)]
Derivative assets[3]	0.7	0.7**	FV PL
Total non-current	**15.9**	**15.9**

Total current	**84.4**	**84.4**	
Total	**100.3**	**100.3**	
Financial liabilities:			
Interest-bearing loans[2]	51.0	51.0**	Amortised cost
Other financial liabilities[3]	7.2	7.2*	FV PL/IAS 32.23[b)]
Liabilities from the issuance of a bond[2]	200.0	191.3**	Amortised cost
Derivative liabilities[3]	0.0	0.0**	FV PL
Total non-current	**258.2**	**249.5**	
Trade payables and other liabilities[2]	79.6	79.6**	Amortised cost
Interest-bearing loans[2]	68.1	68.1**	Amortised cost
Derivative liabilities[3]	0.6	0.6**	FV PL
Total current	**148.3**	**148.3**	
Total	**406.5**	**397.8**	

The Group uses the following hierarchy to determine the fair values of financial instruments and for the purpose of disclosures according to the measurement techniques:

*): Techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data (level III). Level III parameters for participations in companies are determined with the help of information on economic developments and available industry and company data.

**): Techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly (level II). The fair value of debt instruments that are not actively traded, such as loans, borrowings and financial liabilities, as well as shares in unlisted companies, is determined by discounting the future cash flows. If discounting is necessary, this is based on current standard market interest rates over the remaining term of the financial instruments. The market values of the other financial assets and liabilities correspond to the respective carrying amounts.

1) „Loans and receivables measured at amortised cost“ category
2) „Financial liabilities and assets measured at amortised cost“ category
3) „Measured at fair value“ category

There were no transfers between the levels of the fair value hierarchy.

a) The call option to acquire additional shares in Missoni was valued using the Black-Scholes model, based on an expected volatility of approximately 35% and a risk-free interest rate of 2.3%.

b) This item includes a liability arising from an obligation to acquire shares in accordance with IAS 32.23, for which both initial recognition and subsequent changes in value are offset directly against equity attributable to shareholders.

5.6 Hedging future cash flows

As at June 30, 2026, the Group held one interest rate swap with a notional principal amount of EUR 2.3 million (December 31, 2025: one interest rate swap with a notional principal amount of EUR 3.6 million). The change in fair value during the reporting period was EUR 0.0 million (2025: EUR 0.0 million). The interest rate swap serves to hedge the risk of an increase in the variable interest rate and is structured accordingly.

The Group uses derivative financial instruments to manage risks arising from exchange rate fluctuations. Derivative financial instruments are recognised at fair value on initial recognition and are also measured at fair value in subsequent periods. Where the requirements for hedge accounting under IFRS 9 are met, derivative financial instruments are designated as hedging instruments within cash flow hedges. The effective portion of changes in the fair value of these hedging instruments is initially recognised in other comprehensive income and reported in the hedging reserve within equity. The ineffective portion of the hedging relationship is recognised immediately in profit or loss.

Where derivative financial instruments are not included in a hedging relationship within the meaning of hedge accounting, they are accounted for as standalone derivatives. Changes in their fair value are recognised immediately in profit or loss.
Foreign currency forward contracts are designated as hedging instruments within cash flow hedges to hedge expected revenue in euros and expected purchases in US dollars. The objective of these hedging relationships is to reduce the risk arising from exchange rate fluctuations in connection with future cash flows. The volume of foreign currency forward contracts held is determined by the level of expected revenue and purchases in fo-

reign currency and may also change as a result of changes in forward exchange rates.

In connection with the acquisition of the Bogner companies as at September 1, 2025, the underlying hedged items and the associated hedging instruments were re-designated for hedge accounting purposes. As a result, the development of the reported hedge accounting positions during the reporting period is only comparable to a limited extent with the underlying economic movements.

At the balance sheet date, the hedging reserve amounted to EUR 0.7 million. The derivative financial instruments show positive market values of EUR 0.7 million and negative market values of EUR 0.6 million. The foreign currency forward contracts used within cash flow hedges have a notional volume of USD 36.5 million, the hedged items amount to USD 61.7 million, and they mature by early 2028.
The basis adjustment recognised in connection with hedged items amounted to EUR 0.0 million. This relates to adjustments to the carrying amounts of inventories resulting from the hedging of expected foreign currency purchases. Once the hedged purchases are realised and the corresponding inventories are recognised in the balance sheet, the hedging result previously recognised in the hedging reserve is reclassified into the carrying amount of the inventories. As a result, the effect of the hedging relationship becomes part of the cost of the inventories and only affects profit or loss when the inventories are consumed or sold.

Development of the hedging reserve

The hedging reserve developed as follows during the financial year:

in EUR million	
Balance as at January 1, 2026	0.2
Effective changes in the fair value of hedging instruments recognised in other comprehensive income	0.9
Amounts reclassified into the carrying amount of inventories (basis adjustment)	0.0
Amounts reclassified to profit or loss	-0.1
Deferred taxes	-0.3
Balance as at June 30, 2026	**0.7**

Maturities of hedging instruments and expected timing of hedged cash flows

The foreign currency forward contracts used for hedging and the hedged items have the following remaining maturities:

Notional volume (in USD million)	1 year	1-2 years	>2 years	Total
Underlying contracts	31.4	30.3	0.0	61.7
Foreign currency forward contracts	24.5	12.0	0.0	36.5

The maturities of the hedging instruments substantially correspond to the expected timing of the hedged cash flows.

6. SEGMENT REPORTING

The Katjes International Group is a brand holding company that develops and distributes consumer goods brands through its investments, with a focus on confectionery, personal care and body care, as well as lifestyle products. The portfolio includes established brands such as Sperlari, Treets, Dallmann's, Bübchen, Barnängen, Candy Kittens, Graze and Bogner, all of which are managed in a similar manner. The geographic focus of activities is on Europe.

Katjes International regards itself as a strategic investor in strong, established brands. Even following an acquisition, the brands and their respective companies remain organisationally independent and are managed operationally by local management teams. Overall management, however, takes place at the level of the Group as a whole, with a focus on the long-term development and value enhancement of the brand portfolio.

Segment reporting is carried out in accordance with IFRS 8 on the basis of the so-called management approach. The chief operating decision maker (CODM) is the management of Katjes International. Management assesses economic performance and makes decisions on resource allocation, investments, and strategic measures solely on the basis of the consolidated financial information of the Group as a whole. There is no regular internal reporting or performance assessment by individual business divisions or operating segments.

Against this background, the Group represents a single operating segment within the meaning of IFRS 8 from the perspective of internal management. The consolidated operating result (EBITDA) of the Group serves in particular as the central management metric. The measurement principles applied in internal reporting correspond to the IFRS Accounting Standards (IFRS).

Group revenue by region:

in EUR million	6M-2026	6M-2025
Germany	90.4	57.2
UK	37.8	10.7
Italy	34.5	35.7
Switzerland	24.6	15.1
Netherlands	8.8	8.5
North America	7.2	2.4
France	5.2	6.8
Other EU countries	34.5	27.1
Countries outside the EU	13.0	1.3
Total	**256.0**	**164.8**

Material non-current assets of the Group by region:

in EUR million	June 30, 2026	Dec 31, 2025
Germany	367.4	305.4
Italy	95.6	93.9
UK	71.1	10.9
Switzerland	16.6	17.5
Netherlands	14.3	12.3
North America	8.9	9.7
Austria	1.1	1.2
Other	0.4	0.5
Total	**575.4**	**451.4**

Non-current assets in Germany and the United Kingdom as well as in the other countries include investments accounted for using the equity method in a total amount of EUR 55.9 million.

7. COMMITMENTS TO PURCHASE PROPERTY, PLANT AND EQUIPMENT

As of June 30, 2026, payment obligations for the acquisition of property, plant and equipment amounted to EUR 1.2 million.

Beyond this, as at June 30, 2026, there were no significant payment obligations from the acquisition of property, plant and equipment.

8. TRANSACTIONS WITH RELATED PARTIES

Related parties within the meaning of IAS 24 are persons or entities that can be influenced by the reporting entity or that can influence the reporting entity.

The parent company is managed by the general partner Xaver Fassin International GmbH, whose managing directors and shareholders are Mr. Bastian Fassin and Mr. Tobias Bachmüller. These individuals are also the limited partners of the parent company.

The following transactions were conducted with related parties:

in EUR million	June 30, 2026	Dec. 31, 2025
Trade payables to related parties	5.9	3.2
Trade receivables from related parties	6.3	3.2
Loans to/from related parties	-3.0	4.8

in EUR million	6M-2026	6M-2025
Sale of goods and services to related parties	4.1	3.2
Purchase of goods and services from related parties	20.1	9.4
Total remuneration of management*	0.3	0.1
Interest income from loans	0.2	0.1
Other income	0.1	5.0
*Remuneration of the general partner		

All business relationships are conducted on arm's length terms and are unsecured.

The interest-bearing current accounts of the limited partners bear interest at 5.0% (previous year: 5.0%).

Disclosure of the remuneration of governing bodies beyond the remuneration paid to the general partner is waived with reference to the protective clause of Section 286 (4) HGB in conjunction with Section 315e (1), (3) HGB.

9. EVENTS AFTER THE BALANCE SHEET DATE

No events of particular significance or with material effects on the results of operations, financial position, or net assets, known to the management of Katjes International, have occurred after the reporting date of June 30, 2026.

These interim consolidated financial statements were approved and released for publication by management on September 8, 2026.

Emmerich, September 8, 2026

DISCLAIMER

This report contains forward-looking statements that are based on the current assumptions and estimates of the management of Katjes International GmbH & Co. KG. Forward-looking statements are identified by the use of words such as expect, intend, plan, anticipate, assume, believe, estimate and similar formulations.

These statements are not to be understood as guarantees that these expectations will prove to be correct. The future development and the results actually achieved by Katjes International GmbH & Co. KG and its affiliated companies depend on a number of risks and uncertainties and may therefore differ materially from the forward-looking statements.

Various of these factors are beyond the company's control and cannot be accurately estimated in advance, such as the future economic environment and the behaviour of competitors and other market participants. The company neither plans nor undertakes to update any forward-looking statements.
